phone (513) 241-5924

1981 ARTICLE INDEX

A subject listing of articles published in MODERN MACHINE SHOP during the past year.

ABRASIVE BELT MACHINING
Bonded Backing Begets Better Belts — Aug. 161

ADHESIVES, FASTENING
Status Of U.S. Standards For Metric Screw Threads — Oct. 102

ALLOYS
Aluminum Machining: A Practical Approach — Mar. 101
Use Of Advanced Tool Steel Saves Time And Money — Nov. 156

BORING
Jigmil Solves Costly Assembly Problem — Jan. 120
Automatic Tool Positioner Holds Tight Tolerance — Jan. 134
Angular Digital Readout Solves Boring Problem — Apr. 144
Three-Spindle CNC Machining Center With Simultaneous Tool Changing — Sept. 150

BROACHING
Hydraulic Press Highlights Flexibility — Jan. 92

BURNISHING & POLISHING
Hydraulic Press Highlights Flexibility — Jan. 92
A Chipless Way To Obtain Precision Finishes — June 114
Lapping And Polishing Wafers Without Wax — Aug. 126

CAD/CAM
CAD/CAM Suppliers Join Forces — Jan. 141
NC And CAM Technology: A Worldwide Application — May 119
Tomorrow's Automated Factory — June 147
Fanuc's New Computer-Controlled Plant — Sept. 82
Computer-Aided Drafting Streamlines Design Process — Sept. 120
Multi-Application Turnkey CAD/CAM System — Sept. 140
Contract Shop And Principal Computer-Connect — Dec. 116

CARBIDE TOOLING
How Effective Are The Carbide Coatings? — Apr. 98
Getting The Most From The Newer Cutting Tool Materials — Apr. 121
Tool-Grinding Tips — Oct. 97

CERAMIC TOOLING
Getting The Most From The Newer Cutting Tool Materials — Apr. 121

CLAMPING & HOLDING
Getting The Grip On Workholding - Pt. 1 of a 2-Pt. Series — Mar. 81
Getting The Grip On Workholding - Pt. 2 of a 2-Pt. Series — Apr. 106
The Economics Of Fast Tool Changing — Apr. 136
Right Combination Of Machine/Workholding Develops CNC Success — July 103

CUTTING FLUIDS
Why Coolants Really Fail — Jan. 103
New Thoughts On Coolant Control — June 102

DEBURRING
Straight Talk About Deburring — Mar. 109

DRILLING
Oil-Feed Drills Reduce Drilling Time — June 132
Get The Right Point For Drilling — Aug. 82
Gundrilling Is Not A Single-Purpose Process — Aug. 90
Multispindle Drill Head Gives Turning Center Added Capability — Aug. 96
Three-Spindle CNC Machining Center With Simultaneous Tool Changing — Sept. 150
The Countersink Sleeve Solution — Oct. 140
Drill Grinder Produces Three-Rake Fast Geometry — Oct. 156

DUST, MIST & NOISE CONTROL
Smog-Hog Ends Welding Smoke — Nov. 160

ELECTRICAL DISCHARGE MACHINING
EDM: Close Control For A Close Shave — May 80
What's New In EDM? — May 88
Stratified Wire For TW/EDM — May 97
EDM Used For Both Massive And Intricate Die Work — May 124
CNC EDM's Feature Unmanned Operation, Fine Finishes, Clean Electrodes — Aug. 158
Borescope Proves Worth In Job Shop — Dec. 138

EQUIPMENT DESIGN
Today's Coil-Feeding Options — Jan. 83
Powerful And Versatile Programmable Controller — Apr. 152
Rolling Attachment On Bar Machine Cuts Cost — May 132
Machine Vibration Tuned Out — May 136
Custom-Made Machine Processes Cylinder Rods From 9-Inches To 6-Feet Long — June 124
Ceramic Fiber Beats The Heat — July 95
Taiwan: Rising Star Of The Pacific — July 124
Secondary Operations Make The Difference — Oct. 90
Designers Use Biangular Bearings To Stiffen Tables — Dec. 150

EQUIPMENT MAINTENANCE
Preventive Maintenance: Does It Earn Its Way? — Mar. 94
Machine Vibration Tuned Out — May 136

FLEXIBLE MANUFACTURING
Fanuc's New Computer-Controlled Plant — Sept. 82
Flexible Machining System For Medium And Smaller Runs — Oct. 152

GAGING
Automatic Tool Positioner Holds Tight Tolerance — Jan. 134
Retrofit Gives New Life To Coordinate Measuring Unit — May 140
Tool Pre-Setter Reflects Shop Needs — July 136
Plasma Arc Press Handles One-Half-Inch Stainless — Aug. 130
Three Max-Line Digital Readouts — Sept. 148
Electronic Gun Tube Gaging System — Oct. 134

GEAR CUTTING & ROLLING
Gear Cutting Machine Completes Gears In One Rotation — Sept. 144

GRINDING, HONING, LAPPING
3M Introduces New Abrasive Mineral — Jan. 138
Five-Axis CNC Grinder Replaces Tedious Hand Work — Mar. 124
Centerless Grinder Holds Critical Tolerances — Apr. 140
Four Types Grinding Without Wheel Change — Apr. 270
New Forms Of CBN Promote Abrasive Machining — July 138
Get The Right Point For Drilling — Aug. 82
Lapping And Polishing Wafers Without Wax — Aug. 126
Bonded Backing Begets Better Belts — Aug. 161
Tool-Grinding Tips — Oct. 97
Drill Grinder Produces Three-Rake Fast Geometry — Oct. 156
Creep-Feed Grinding Tool Steels, Die Steels And Hot Work Steels — Dec. 92
Grinding Soft Metals For Finish And Accuracy — Dec. 100
Universal Grinding With Computer Numerical Control — Dec. 107
Wheel Dressing Equipment Enhances Form Grinding — Dec. 134
Programmable Wheel Feed Improves Grinding — Dec. 152

HEAT TREATING & CHILLING
Temperature-Indicating Crayon Measures Preheat — Jan. 126
Ceramic Fiber Beats The Heat — July 95

HIGH SPEED STEEL TOOLING
Tool-Grinding Tips — Oct. 97

INSPECTION & QUALITY CONTROL
Temperature-Indicating Crayon Measures Preheat — Jan. 126
Automatic Tool Positioner Holds Tight Tolerance — Jan. 134
Angular Digital Readout Solves Boring Problem — Apr. 144
Retrofit Gives New Life To Coordinate Measuring Unit — May 140
Problem Solved With Vertical Turning Machine — July 120
Coordinate Measurement Software For All Needs — July 141
Borescope Proves Worth In Job Shop — Dec. 138

INVENTORY CONTROL
Microprocessor Scale Unit Quickly Counts Small Parts — May 128
MRP Software Controls Processing And Inventory — Sept. 112

LUBRICATION
Right Lubricant Film Cuts Power Use And Wear — May 143

MATERIAL HANDLING
Microprocessor Scale Unit Quickly Counts Small Parts — May 128
Workhandling Steals The Show At Hanover's EMO 81 — Nov. 129
Increasing Productivity With Good Work Handling — Nov. 146
Foam-Core Egg-Crate Pallets Protect Components — Nov. 150

MATERIALS
New Forms Of CBN Promote Abrasive Machining — July 138
Foam-Core Egg-Crate Pallets Protect Components — Nov. 150
Use Of Advanced Tool Steel Saves Time And Money — Nov. 156

METAL CUTOFF
Diversified Parts Cut Off With One Tool — June 138

METALLURGY
Use Of Advanced Tool Steel Saves Time And Money — Nov. 156

MILLING
Jigmil Solves Costly Assembly Problem — Jan. 120
Simplified Feed Screw Milling — Feb. 84
High-Speed Milling: Where Do We Stand? — Feb. 89
The Working Face Mill — Feb. 98
The Essentials Of Thread Milling — Feb. 106
Indexable Step Cutters Overcome Problems — Feb. 120
Multiple Edges From Single Round End-Mill Insert — Feb. 148
Aluminum Machining: A Practical Approach — Mar. 101
A New Approach To Machining Valve Seats — Apr. 126
High Production Equipment Is New Thrust — Apr. 156
Minimize Workpiece Handling Time — Sept. 92
Three-Spindle CNC Machining Center With Simultaneous Tool Changing — Sept. 150

NC MACHINES & CONTROLS
CNC Capability Added To Hard-Wired NC — Feb. 128
Preventive Maintenance: Does It Earn Its Way? — Mar. 94
NC And CAM Technology: A Worldwide Application — May 119
A Huge Concentration Of Computer Power — May 146
Economical And Quick Way To Tapeless CNC — June 128
Gang Tooling And CNC Lead To Flexible Manufacturing — June 142
Knowing NC Capability Is Key To Productivity — July 76
Where Do We Stand On Programming Sculptured Surfaces? — July 84
Right Combination Of Machine/Workholding Develops CNC Success — July 103
"Timesharing" An NC Machining Center — July 116
Problem Solved With Vertical Turning Machine — July 120
Programmable Chip Controls Transfer Line Operations — Aug. 152
Modular CNC Features Reliability And Compactness — Aug. 154
Fanuc's New Computer-Controlled Plant — Sept. 82
NC Helps Develop Instruments For Brain Surgery — Nov. 116
Universal Grinding With Computer Numerical Control — Dec. 107
Contract Shop And Principal Computer-Connect — Dec. 116

NC PROGRAMMING
Simplified Feed Screw Milling — Feb. 84
Five-Axis CNC Grinder Replaces Tedious Hand Work — Mar. 124
Knowing NC Capability Is Key To Productivity — July 76
Where Do We Stand On Programming Sculptured Surfaces? — July 84
NC Tape Or Template? There Is A Choice — July 112
Eliminate The Estimation Guesswork — Oct. 112
NC Helps Develop Instruments For Brain Surgery — Nov. 116
Contract Shop And Principal Computer-Connect — Dec. 116

NONCONVENTIONAL MACHINING
Plasma Arc Press Handles One-Half-Inch Stainless — Aug. 130

PLANT LAYOUT
Fanuc's New Computer-Controlled Plant — Sept. 82
Flexible Machining System For Medium And Smaller Runs — Oct. 152
Building Machine Tools For The World — Nov. 98
Phase Generator Powers Entire Machine Shop — Dec. 146

PLANT MANAGEMENT
Financing Strategy Spells Growth — Mar. 120
Making Productivity A Reality—Not Just A Slogan — Apr. 162
How To Sell A Company At The Right Price — May 104

PLANT MANAGEMENT (CONT'D)
Machine Vibration Tuned Out — May 136
A Huge Concentration Of Computer Power — May 146
Tomorrow's Automated Factory — June 147
Knowing NC Capability Is Key To Productivity — July 76
Where Do We Stand On Programming Sculptured Surfaces? — July 84
How To Get Maximum Estate Benefits From Your Machine Shop — July 100
"Timesharing" An NC Machining Center — July 116
Taiwan: Rising Star Of The Pacific — July 124
Can Mandated Health And Safety Modifications Be Expensed? — Aug. 114
Fanuc's New Computer-Controlled Plant — Sept. 82
Quality Circles "Made In Japan" — Sept. 101
Flexible Financing Is A Productivity Tool — Sept. 108
Leasing Attracting Today's Machine Tool Users — Sept. 124
Eliminate The Estimation Guesswork — Oct. 112
Keys To Improved Productivity — Oct. 121
Building Machine Tools For The World — Nov. 98
Contract Shop And Principal Computer-Connect — Dec. 116
The Computer Tax Question — Dec. 124
Phase Generator Powers Entire Machine Shop — Dec. 146

PRESSWORKING
Today's Coil-Feeding Options — Jan. 83
Hydraulic Press Highlights Flexibility — Jan. 92
Don't Shortchange Stamping-Die Details — Jan. 97
Adjustable-Speed Drive Boosts Press Up-Time — Apr. 148
Plasma Arc Press Handles One-Half-Inch Stainless — Aug. 130
Dual-Lane Press Transfer Produces Easy-Open Can Ends — Dec. 142
Triple-Track Bridge-Frame CNC Turret Punch Press — Dec. 162

ROBOTICS
Let's Discuss Robots - Pt. 3 of an 8-Pt. Series — Jan. 115
Let's Discuss Robots - Pt. 4 of an 8-Pt. Series — Feb. 115
Let's Discuss Robots - Pt. 5 of an 8-Pt. Series — Mar. 113
Let's Discuss Robots - Pt. 6 of an 8-Pt. Series — Apr. 131
Let's Discuss Robots - Pt. 7 of an 8-Pt. Series — May 115
Let's Discuss Robots - Pt. 8 of an 8-Pt. Series — June 119
Fanuc's New Computer-Controlled Plant — Sept. 82
Flexible Machining System For Medium And Smaller Runs — Oct. 152
Understanding Robot Movements — Nov. 86
PC-Controlled Robots Add 2000-Plus Welds — Nov. 140
Robot Maker Looks Beyond Auto Assembly Line — Nov. 168
Controlled Positioners Aid Robot Welding — Nov. 172
High Performance General Purpose Robot — Dec. 156

SAFETY
Can Mandated Health And Safety Modifications Be Expensed? — Aug. 114
Lift It Right — Nov. 124

SCRAP HANDLING
Separator Saves $7,500 Per Month In Chip Losses — Jan. 130
Integrated Chip Handling System — Nov. 152

SCREW & AUTOMATIC MACHINING
Small Cincom NC Lathes — Apr. 160
Secondary Operations Make The Difference — Oct. 90

SCREW & AUTOMATIC MACHINING (CONT'D)
Tool-Grinding Tips — Oct. 97
Eliminate The Estimation Guesswork — Oct. 112
"Diagram" For Eliminating A Grinding Operation — Oct. 126
Integrated Chip Handling System — Nov. 152

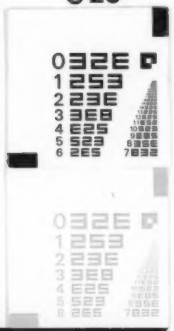
STAMPING, BLANKING & BENDING
NC Punch/Shear Team Makes Productivity Winner — July 108
How To Stamp Chalky Metals — Sept. 96

TAPPING & THREADING
The Essentials Of Thread Milling — Feb. 106
Rolling Attachment On Bar Machine Cuts Cost — May 132
NC Tool Point System For Turning And Threading — June 146
Thread Rolling Is More Than Rolling Threads — Aug. 103
Status Of U.S. Standards For Metric Screw Threads — Oct. 102
Thread Milling Cuts Secondary Operation — Oct. 130

TOOL & DIE DESIGN
Don't Shortchange Stamping-Die Details — Jan. 97
Tool-Grinding Tips — Oct. 97

TURNING
Automatic Tool Positioner Holds Tight Tolerance — Jan. 134
Wyman-Gordon Turns On CNC — Feb. 124
Getting The Grip On Workholding - Pt. 1 of a 2-Pt. Series — Mar. 81
Aluminum Machining: A Practical Approach — Mar. 101
NC Plastic Turning — Mar. 116
Getting The Grip On Workholding - Pt. 2 of a 2-Pt. Series — Apr. 106
High-Speed Turning: Where Do We Stand? — June 82
Turning With Advanced Inserts — June 89
Gang Tooling And CNC Lead To Flexible Manufacturing — June 142
NC Tool Point System For Turning And Threading — June 146
Multispindle Drill Head Gives Turning Center Added Capability — Aug. 96
Successful Machining Of Special Metals With VFR — Aug. 122
Auto Industry Gets High Production CNC Lathe — Aug. 148
CNC Turns Large Jet Engine Parts — Sept. 116

VIBRATORY FINISHING
Vibratory System Improves Cylinder Quality — Dec. 130

WELDING
Temperature-Indicating Crayon Measures Preheat — Jan. 126
Programmable Controlled EB Welder Turns Out Flywheel Family — June 134
Weld Deposition Rates Three Times Faster — Oct. 136
PC-Controlled Robots Add 2000-Plus Welds — Nov. 140
Controlled Positioners Aid Robot Welding — Nov. 172


C 20
